

Thank you for your request to use the GTS logo,
GTS product icons and/or images.

**To best support your work and layout, we provide various formats.
When using GTS icons/logos, please adhere to these guidelines:**

1. GTS logos and images may only be used where GTS or GTS products are mentioned or referenced.
2. Use the **GTS logo** when referring to GTS as a company:

Preferably, please use this version: 

If you need a square image, choose the **-square** file.

If it better fits for your layout, you can use the wide version: 

3. Use the **GTS Framework** logo / **product icons** when referring to GTS products.
4. Be sure to keep the proportions (aspect ratio) so that the logo is not distorted. Place on a white or very bright background. On a dark background, use the white version of the logo (contact us for respective files).
5. Leave enough white space (a distance greater or equal to half the height of the logo) around it, especially if there are other logos next to it in your layout.
6. Use the **-CMYK.pdf** files for printed material to ensure proper quality. Use the **.png** files for the Web and for Office Applications such as PowerPoint presentations, Word, Excel or the like.

For obtaining the files and further information, please contact:
